CRP Industries Unveils New Website for Industrial Unit

Cranbury, NJ... CRP Industries Inc., a North American supplier of high-pressure paint spray, industrial hoses, synchronous belts, and high speed electric motors, has unveiled a new website for its diversified and growing industrial business unit. The website represents the final stage of a major rebranding initiative for the industrial group that began in 2011. It features the four key brands that now make up CRP Industrial, namely ContiTech Synchronous Belts, Reinflex High-Pressure Hoses, Perske High Speed Electric Motors, and Tudertechnica Rigid Mandrel Hoses.

The new website showcases the four CRP Industrial brands with an interactive feel and crisp graphics. It is designed to provide a user-friendly experience with improved navigation and functionality, allowing users to access detailed product information and industry solutions.

CRP Industrial is a division of CRP Industries Inc., one of NAFTA's largest suppliers of specific industrial accessories and applications, and has been a proven partner to the North American fluid transfer market for more than 20 years, specializing in custom orders for high-pressure thermoplastic hoses.

The group consists of four diverse specialty product groups: Tudertechnica Rigid Mandrel Hose, ContiTech Industrial Belts, Perske High Speed Electric Motors, and Reinflex High-Pressure Thermoplastic hoses. With the support of warehouses in the USA and Canada, CRP can fabricate and ship an order in as little as 24 hours.
