# CRP INDUSTRIAL IS PROUD TO OFFER A HIGH QUALITY LINE OF SANITARY HOSE.

CRP Industrial is proud to offer a complete line of hose for a wide variety of industries including dairy, brewery, cosmetic, and pharmaceutical.

We take enormous pride in our ability to listen and communicate with our customers — and in understanding exactly what they need. No matter what the issue, our highly trained customer service staff stands ready to solve any request. Because of our commitment, CRP has built a lengthy list of high profile clients.

At CRP, we pay great attention to the products we carry, the people we work with, and the way in which we conduct business. In fact, quality, service, and trust are the greatest attributes we offer. These qualities don't have a SKU and they can't be pulled off some warehouse shelf.

## ■ QUALITY CONTROL

CRP is ISO 9001:2015 certified, so customers can rest assured that we have a quality management system in place that delivers service satisfaction from start to finish. Additionally, select hoses meet all applicable government food-safety standards.

## ■ PROMPT TURNAROUND

For many of our customers, a speedy response is crucial. Fortunately, due to our vast selection of stock hose types and fittings, our turnaround time for orders is typically 24 to 48 hours. Of course, if time is of the essence, we may even be able to ship same day.

## ■ TOP-NOTCH SERVICE

A proud member of the FISA, IDCO, and NAHAD organizations, CRP has been an expert in hose assembly fabrication for over 40 years. Led by a team of extraordinary customer service representatives, we excel at understanding and meeting the needs of all our customers — and can even develop a custom-built product based on your specifications.

# ATC

## ARMORED THERMOPLASTIC COVER

### ATC HOSE PRODUCT FEATURES

Cleanability	Bacteria and Microbe Resistant Cover Corrugations Prevent Pooling Ideal for CIP Easy to Clean
Durability	Abrasion Resistant Cover Chemical and Oil Resistant Cover
Handling	Flexible and Lightweight Design Ergonomic Features Easy to Slide
Appearance	Ozone Resistance to Prevent Premature Aging UV Resistance to Hold Color Retains Original Appearance
Selection	Variety of Liners, Designs, and Colors Specialized for Specific Applications Workhorses for Many Applications

## Food & Beverage

### CRP Industrial's Sanitary Food & Beverage hoses are the choice of experts with a taste for the best.

Featuring our Armored Thermoplastic Covers. Built from the core out on a proprietary rigid mandrel frame, CRP Industrial sanitary hoses for the Food & Beverage industry incorporate liners, plies, and covers chosen specifically for each individual application. All are phthalates-free and meet every applicable government food-safety standard in the US, Europe, and Japan — including a 3A Sanitary Standard Class II rating.

Here are just a few benefits designed into CRP Industrial Food & Beverage hoses:

- Abrasion Resistant
- Non-marking
- Corrugated profile prevents fluid ponding when the hose is on the ground
- Easy to clean glossy cover and smooth bore tube
- Mold resistant

CRP Industrial has been offering high-quality hose for over 40 years and is the leading choice of many Food & Beverage companies in North America.

For details, call CRP's US headquarters at 800.526.4066.

# Butyl Armored Thermoplastic Cover

8100 Series

Premium grade, low permeation, extra flexible suction and delivery hose for the food and beverage industry. Features easy-to-clean, abrasion-resistant cover.

**Technical Characteristics:**

- Temperature Range: -40°F / +248°F (-40°C / +120°C)
- Dimensional Tolerance: ISO1307
- Vacuum:: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: Bromobutyl (BIIR), white, phthalate-free, tested in compliance with 1907/2006/CE (REACH)  
Meets FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, Galvanized wire helices
- Cover: Wide corrugated, low friction UHMW cover. Non-marking, abrasion, chemical and microbe resistant.
- Color Options:
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# Butyl Armored Thermoplastic Cover HD

8120 Series

Premium grade, heavy duty, low permeation, extra flexible suction and delivery hose for the food and beverage industry. Features easy-to-clean, abrasion-resistant cover.

**Technical Characteristics:**

- Temperature Range: -40°F / +248°F (-40°C / +120°C)
- Dimensional Tolerance: ISO1307
- Vacuum:: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: Bromobutyl (BIIR), white, phthalate-free, tested in compliance with 1907/2006/CE (REACH)  
Meets FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, Galvanized wire helices
- Cover: Wide corrugated, low friction UHMW cover. Non-marking, abrasion, chemical and microbe resistant.
- Color Options:
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# Butyl Crush Resistant ATC

8110 Series

Premium food and beverage hose featuring low permeation. This hose features synthetic plies that allow the hose to rebound.

**Technical Characteristics:**

- Temperature Range: -40°F / +212°F (-40°C / +100°C)
- Dimensional Tolerance: ISO1307

**Hose Construction:**

- Tube: Bromobutyl (BIIR), white, phthalate-free, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, Synthetic wire helices
- Cover: Wide corrugated, low friction UHMW cover. Non-marking, abrasion, chemical and microbe resistant
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# Nitrile Armored Thermoplastic Cover

8300 Series

Premium grade suction and delivery hose specialized for fatty food products. Ideally suited for milk and dairy applications. Features easy-to-clean, abrasion-resistant cover.

**Technical Characteristics:**

- Temperature Range: -4°F / +194°F (-20°C / +90°C)
- Dimensional Tolerance: ISO1307
- Vacuum:: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: Nitrile (NBR), white, phthalate-free, tested in compliance with 1907/2006/CE (REACH) Meets FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, Galvanized wire helices
- Cover: Wide corrugated, low friction UHMW cover. Non-marking, abrasion, chemical and microbe resistant.
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# EPDM Armored Thermoplastic Cover

8400 Series

Premium grade suction and delivery hose specialized for acidic food products. Ideally suited for a wide range of food and beverage products.

**Technical Characteristics:**

- Temperature Range: -40°F / +248°F (-40°C / +120°C)
- Dimensional Tolerance: ISO1307
- Vacuum:: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: EPDM, white, phthalate-free, tested in compliance with 1907/2006/CE (REACH) Meets FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, Galvanized wire helices
- Cover: Wide corrugated, low friction UHMW cover. Non-marking, abrasion, chemical and microbe resistant.
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# SRT Butyl

8170 Series

Premium suction and delivery hose for transfer of food and beverage products with low permeability tube well suited for wine and spirits.

**Technical Characteristics:**

- Temperature Range: -13°F / +176°F (-25°C / +80°C)
- Dimensional Tolerance: ISO1307

**Hose Construction:**

- Tube: Bromobutyl (BIIR), white, phthalate-free, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, External thermoplastic helix
- Cover: Corrugated rubber cover with thermoplastic helix
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# SRT Nitrile

8370 Series

Lightweight and flexible tank transfer hose designed for fatty and oily food products. Well suited for dairies.

Technical Characteristics:

- Temperature Range: -13°F / +176°F (-25°C / +80°C)
- Dimensional Tolerance: ISO1307

Hose Construction:

- Tube: Nitrile (NBR), white, phthalate-free, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, External thermoplastic helix
- Cover: Corrugated rubber cover with thermoplastic helix
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# Distillery Armored Thermoplastic Cover

8200 Series

Specialized low permeation suction and delivery hose for the food and beverage industry. Developed for distilleries and food and beverage sites with aggressive cleaning procedures.

Technical Characteristics:

- Temperature Range: -31°F / +212°F (-35°C / +100°C)
- Dimensional Tolerance: ISO1307
- Vacuum: 13 psi (0.9 bar)

Hose Construction:

- Tube: UHMWPE, white, phthalate-free, tested in compliance with 1907/2006/CE (REACH) Meets FDA 21 CFR 177.1520, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, Galvanized wire helices, Antistatic copper wire
- Cover: Wide corrugated, low friction UHMW cover. Non-marking, abrasion, chemical and microbe resistant.
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

# Hot Oil Hose

8389 Series

Premium grade suction and delivery hose designed for hot oil. Specifically designed for the rigorous application of hot oil suction and recycling.

**Technical Characteristics:**

- Temperature Range: -40°F / +302°F (-40°C / +150°C)
- Dimensional Tolerance: ISO1307
- Vacuum: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: HNBR, white, phthalate-free, tested in compliance with 1907/2006/CE (REACH) Meets FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II
- Reinforcement: Synthetic plies, Galvanized wire helices
- Cover: Smooth, oil resistant rubber cover
- Color Options:
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

CRP Part Number	Color	Inside Diameter (in)	Outside Diameter (in)	Vacuum: (psi)	Working Pressure (psi)	Burst Pressure (psi)	Weight (lbs/ft)	Bend Radius (in)

# Wrapped Wash Down

1016W Series

Softwall hot water discharge hose for floor and equipment wash down in dairies, creameries, food processing plants, and paper mills, etc.

**Technical Characteristics:**

- Temperature Range: -40°F / +176°F (-40°C / +80°C)

**Hose Construction:**

- Tube: White, smooth, SBR rubber
- Reinforcement: High strength synthetic cord
- Cover: Color based, smooth, (wrapped finish) EPDM, weathering and ozone resistant
- Color Options: Other colors available upon request.
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

CRP Part Number	Color	Inside Diameter (in)	Outside Diameter (in)	Vacuum: (psi)	Working Pressure (psi)	Burst Pressure (psi)	Weight (lbs/ft)	Bend Radius (in)
1016WHW		0.625	1.00	N/A	150	450	0.25	N/A

# Extruded Wash Down

1016E Series

Hot water washing hose in food environment with excellent resistance to high temperatures. Suitable for hygienic operations in dairies, canneries, slaughterhouses, and all food processing industries.

**Technical Characteristics:**

Temperature Range: -4°F / +203°F  
(-20°C / +95°C)

**Hose Construction:**

- Tube: White, seamless synthetic rubber, phthalate-free, fat resistant, made with materials in compliance with FDA tit 21 art. 177.2600 and BfR XXI Cat.3.
- Reinforcement: High strength synthetic fabrics.
- Cover: Antimicrobial, seamless synthetic rubber, made with materials in compliance with ISO 22196:2011. Aging, ozone, and fat resistant.
- Color Options:  Other colors available upon request.
- Sterilization: See cleaning and sterilizing guidelines for food and beverage hose.

1016-WEX		0.625	1.00	N/A	150	450	0.29	N/A

# CRP ATC PTFE

8751 Series

Top of the line suction and delivery hose for nearly all food, beverage, and high sanitary applications. The PTFE tube combines flexibility and purity with elite chemical resistance. Features highly cleanable UHMW cover.

**Technical Characteristics:**

Temperature Range: -40°F / +302°F  
(-40°C / +150°C)

Dimensional Tolerance: EN12115

Vacuum: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: PTFE, White, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, USP Class VI, ISO 10993 Sections 5, 10, 11:2009
- Reinforcement: Synthetic plies, Stainless steel wire helices, Antistatic copper wire
- Cover: Wide corrugated Blue UHMW cover. Non-marking, abrasion, chemical and microbe resistant.
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines.

# Pharmaceutical & Cosmetic

## The beauty of CRP Industrial Pharmaceutical & Cosmetic hoses is more than skin deep.

Built from the core out on a proprietary rigid mandrel frame, CRP Industrial high-purity pharmaceutical hoses for the pharmaceutical and cosmetic industries incorporate liners and plies to accommodate a myriad of sanitary applications. Liners are available in PTFE; plus the Platinum-Cured Silicone liner in our silicone series of hoses. Select hoses are designed for applications where static electricity can build up, helping avoid dangerous discharges.

Here are a few benefits designed into CRP Industrial Pharmaceutical & Cosmetic hoses:

- Ozone Resistant Cover (abrasion resistant in many cases)
- Flexible hoses allow for easier routing
- Choice of liners specific to applications

CRP Industrial has been offering high-quality hose for over 40 years and is the leading choice of many pharmaceutical and cosmetic companies in North America.

For details, call CRP's US headquarters at 800.526.4066.

# Silicone

9000 Series

Platinum cured silicone suction and delivery hose designed for pharmaceutical and cosmetic applications. Features high flexibility, high purity, and extraordinary temperature resistance. Manufactured in an ISO class 8 cleanroom.

### Technical Characteristics:

- Temperature Range: -76°F / +392°F  
(-60°C / +200°C)
- Dimensional Tolerance: ISO 1307
- Vacuum: 13 psi (0.9 bar)

### Hose Construction:

- Tube: Silicone, clear, manufactured in an ISO class 8 cleanroom, tested in compliance with 1907/2006/CE (REACH). Meets FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, 3A Sanitary Standard Class II, USP Class VI, ISO10993 Sections 5, 10, 11:2009
- Reinforcement: Synthetic plies, Stainless steel helices
- Cover: Smooth, translucent silicone cover
- Color Options:

# CRP PTFE Pharma

7959 Series

Top of the line suction and delivery hose for nearly all pharmaceutical and cosmetic applications. The PTFE tube combines flexibility and purity with elite chemical resistance.

Technical Characteristics:

- Temperature Range: -40°F / +302°F (-40°C / +150°C)
- Dimensional Tolerance: EN12115
- Vacuum: 13 psi (0.9 bar)

Hose Construction:

- Tube: White PTFE, clear/white, phthalate-free, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, USP Class VI, ISO 10993 Sections 5, 10, 11:2009
- Reinforcement: Synthetic plies, Stainless steel wire helices, Antistatic copper wire
- Cover: White, abrasion resistant EPDM cover
- Color Options:
- Sterilization: See cleaning and sterilizing guidelines.

# CRP PTFE Sil

## 9159 Series

Top of the line ultra flexible suction and delivery hose for nearly all industrial chemicals. The PTFE tube combines flexibility and purity with elite chemical resistance.

**Technical Characteristics:**

- Temperature Range: -40°F / +302°F (-40°C / +150°C)
- Dimensional Tolerance: ISO 1307
- Vacuum: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: Coextruded virgin PTFE, clear/white, phthalate-free, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.1550, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, USP Class VI, ISO 10993 Sections 5, 10, 11:2009
- Reinforcement: Synthetic plies, Stainless steel wire helices, Antistatic copper wire
- Cover: White silicone cover for extreme flexibility and temperature resistance
- Color Options: ☐
- Sterilization: See cleaning and sterilizing guidelines.

# Specialty

## CRP Industrial Specialty hoses keep production lines running.

Built from the core out on a proprietary rigid mandrel frame, CRP Industrial hoses incorporate liners, plies, and covers chosen specifically for each individual application. Liners are available in NBR, Silicone, PTFE, PFA, FEP, UHMW, and EPDM.

Here are just a few benefits designed into CRP Industrial Specialty hoses:

- Abrasion resistant covers
- Integrated static discharge elements in selected hoses
- Choice of liners specific to applications

CRP Industrial has been offering high-quality hose for over 40 years and is the leading choice of many companies in North America.

For details, call CRP's US headquarters at 800.526.4066.

# CRP FEP Chem

7942 Series

Top of the line suction and delivery hose for nearly all industrial chemicals. The PTFE tube combines flexibility and purity with elite chemical resistance.

**Technical Characteristics:**

- Temperature Range: -40°F / +302°F (-40°C / +150°C)
- Dimensional Tolerance: EN12115
- Vacuum: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: Fluorinated Ethylene Propylene (FEP), clear/white, phthalate-free, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.2600, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, USP Class VI
- Reinforcement: Synthetic plies, Stainless steel wire helices, Antistatic copper wire
- Cover: Smooth, abrasion resistant EPDM cover
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines.

# PTFE Chem FC

7962 Series

Top of the line suction and delivery hose for nearly all industrial chemicals. The PTFE tube combines flexibility and purity with elite chemical resistance. The conductivity allows for safe operation with flammable and explosive materials.

**Technical Characteristics:**

- Temperature Range: -40°F / +302°F (-40°C / +150°C)
- Dimensional Tolerance: EN12115
- Vacuum: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: Fully Conductive PTFE, black, Conductive (Type Ω/T) according to EN12115 Standards, complies with 1907/2006/CE (REACH), FDA 21 CFR 177.1550, DM21.03.73 e seguenti, European Reglement 1935/2004/CE, USP Class VI, ISO 10993 Sections 5, 10, 11:2009
- Reinforcement: Synthetic plies, Stainless steel wire helices, Antistatic copper wire
- Cover: Smooth, abrasion resistant EPDM cover
- Color Options: 
- Sterilization: See cleaning and sterilizing guidelines.

# EPDM Chem

9802 Series

Suction and delivery hose for a wide variety of industrial chemicals. Fully conductive hose designed for use in Atex areas (Ex-Zone).

Technical Characteristics:

- Temperature Range: -40°F / +248°F (-40°C / +120°C)
- Dimensional Tolerance: EN12115
- Vacuum: 13 psi (0.9 bar)

Hose Construction:

- Tube: EPDM, Black, Conductive (Type Ω/T)
- Reinforcement: Synthetic plies, Galvanized steel wire helices, Antistatic copper wire
- Cover: Smooth, abrasion resistant EPDM cover
- Color Options:

CRP Part Number	Color	Inside Diameter (in)	Outside Diameter (in)	Vacuum: (psi)	Working Pressure (psi)	Burst Pressure (psi)	Weight (lbs/ft)	Bend Radius (in)

# UHMW Chem FC

8782 Series

Fully conductive suction and delivery hose for a wide variety of industrial chemicals. The thermoplastic tube provides enhanced chemical resistance.

Technical Characteristics:

- Temperature Range: -31°F / +212°F (-35°C / +100°C)
- Dimensional Tolerance: EN12115
- Vacuum: 13 psi (0.9 bar)

Hose Construction:

- Tube: UHMW, clear/black, phthalate-free, Conductive (Type Ω/T), complies with 1907/2006/CE (REACH), FDA 21 CFR 177.1520, DM21.03.73 e seguenti, European Reglement 1935/2004/CE
- Reinforcement: Synthetic plies, Galvanized steel wire helices, Antistatic copper wire
- Cover: Smooth, abrasion resistant EPDM cover
- Color Options:

CRP Part Number	Color	Inside Diameter (in)	Outside Diameter (in)	Vacuum: (psi)	Working Pressure (psi)	Burst Pressure (psi)	Weight (lbs/ft)	Bend Radius (in)

# Silicone SPC

9203 Series

Hard-wall corrugated silicone hose is appropriate for use in cooling systems of automobiles and commercial vehicle engines in locations requiring strong temperature tolerance. Designed for hot air, exhaust air, fluid mixture and oil. Flame retardant compound per ASTM C-542.

**Technical Characteristics:**

- Temperature Range: Air -58°F / +392 °F (-50°C / +200 °C )  
Liquid -40°F / +212 °F (-40°C / +100 °C)
- Standards: SAE J20R2 CLASS A  
ASTM C-542
- Vacuum: 13 psi (0.9 bar)

**Hose Construction:**

- Tube: Smooth colored silicone
- Reinforcement: Synthetic cord and helix wire
- Cover: Corrugated, shiny silicone rubber. Flame retardant according to ASTM C-542.
- Color Options: 

CRP Part Number	Color	Inside Diameter (in)	Outside Diameter (in)	Vacuum: (psi)	Working Pressure (psi)	Burst Pressure (psi)	Weight (lbs/ft)	Bend Radius (in)

# Fittings & Accessories

## CRP Industrial Hose Fittings and Accessories

CRP Industrial offers a variety of internally expanded and externally crimped fittings for sanitary applications. These fittings reduce the potential for bacterial buildup at the end of the stem and the inner liner of the hose.

The uniform crimp pressure eliminates leaking and off-gassing at the interface between the stem and the hose. Chemical and petrochemical hoses can also benefit from the reduced leak path.

Additional fittings and accessories are available upon request.

CRP Industrial has been offering high-quality hose for over 40 years and is a leading choice of sanitary hose accessories for many companies in North America.

For details, call CRP's US headquarters at 800.526.4066.

Chemical Compatibility Chart

CHEMICAL RESISTANCE RATING

- A Good Resistance This chemical has no or minimal effect on the polymer.
- B Fair Resistance This chemical has a small effect on the polymer. Continuous usage, increased temperatures, and high concentrations can negatively affect the polymer.
- C Conditional Resistance This chemical is acceptable for intermittent use or specific conditions.
- D Minimal Resistance This chemical has significant negative effects on the polymer.

This chemical compatibility chart is meant to be a guide only. The listed compounds are the most common tube materials used by CRP Industries Inc. This reflects the effect on the polymer only. It does not factor additional design requirements into the chemical ratings.

For further assistance in selecting the right product for your application, please contact CRP Industries Inc.

The data compiled from multiple sources is based on application temperature of 70° F (21° C) under normal service conditions.

CHEMICAL RESISTANCE RATING    A = Good Resistance    B = Fair Resistance    C = Depends On Conditions    D = Not Recommended

# Guidelines for Cleaning and Sanitizing Food and Beverage Hose

THE FOLLOWING SUGGESTIONS ARE GUIDELINES ONLY. THESE GUIDELINES DO NOT SUPERSEDE EXISTING GOVERNMENT OR INDUSTRY REGULATIONS.

Cleaning and sanitizing is a critical part of every food and beverage process. Chemical and physical cleaners are selected for their ability to remove residue and eliminate biological contamination. In addition, users are required select temperature, concentration, duration and frequency of cleaning. This can be a complicated task.

All of these factors affect the hose life. The cleaning procedure is often the key factor in determining how long an assembly will last. This guide will help end users achieve proper sanitation while maximizing hose life. Several industries have required cleaning and sanitation procedures. CRP Industrial can assist users in selecting a product to best match their unique requirements.

	Medium	Hose Tube	Concentration	Temperature
Rinsing	Hot Water	NBR/Silicone EPDM/BIIR/UHMW PTFE/PFA	-	Max 90°C
Physical Cleaner	Steam	NBR	-	Max 110°C Max 10 min
		EPDM/BIIR/UHMW PTFE/PFA	-	Max 130°C Max 30 min
		Silicone	-	Max 135°C Max 18 min
Chemical Cleaner	Acid (i.e. Nitric acid)	NBR/Silicone	0.1%	Max 65°C
			2%	Max 25°C
		EPDM/BIIR/UHMW PTFE/PFA	0.1%	Max 85°C
			3%	Max 25°C
	Alkaline solution (i.e. Caustic soda)	NBR/Silicone	2%	Max 65°C
			4%	Max 25°C
		EPDM/BIIR/UHMW PTFE/PFA	2%	Max 85°C
			5%	Max 25°C
	Disinfectant (i.e. Peracetic acid)	NBR/Silicone	1%	Max 25°C
		EPDM/BIIR/UHMW PTFE/PFA		Max 40°C

## CLEANING AND SANITIZING STEPS

1. WASHING

The first step in the process is thoroughly washing the hose. Rinsing with hot potable water does not eliminate the need to clean the hose with the appropriate detergent followed by the disinfection of the hose. The initial rinse with hot potable water should be completed as soon as possible after the transfer is completed.
2. CLEANING

The cleaning and disinfecting media depend upon the material/ products being conveyed. The recommendation of the manufacturer of the detergent and disinfectant should be strictly followed especially regarding concentration levels.  
  
The attached chart can offer some guidance based on the hose product being used. Cleaning and sanitation is always the top priority. Increasing the temperature, concentration, and duration of cleaning, does not always provide a better result.

3. DISINFECTING

The cleaning process may kill off many harmful bacteria and contaminants. A round of disinfecting is sometimes needed to eliminate the rest. Cleaners like steam double as good physical disinfectants. Peracetic acid (PAA) is a common chemical disinfectant in breweries. It typically follows an acid and alkaline wash.  
  
Temperature, concentration and duration are important factors to consider in the disinfecting step. As soon as the disinfecting is complete, the hose should be carefully and sufficiently rinsed with potable water to eliminate any chemical residue.

4. INSPECTION

The hose assembly should be completely inspected before returning it to service. The outside of the hose should be checked for signs of tearing and over-flexing. The inside of the hose should be inspected as well. The cleaning procedure, can over-time wear down the interior of the hose leaving cracks and grooves that bacteria can reside in. It is critical to check both the interior and exterior. This will help the user refine their process and establish a suitable replacement schedule.

CRP Industrial hoses are suitable for steam sterilization temperatures up to 266°F (130°C) for 30 minutes. The silicone hoses can be sterilized with steam up to 275°F (135°C) for 18 minutes.

# STAMPED:

## The Key to Hose Selection

To identify the correct hose for use in a particular application, it is recommended to use the industry-wide standard **STAMPED**. This acronym stands for **S**ize, **T**emperature, **A**pplication, **M**aterial, **P**ressure, **E**nds, and **D**elivery.

### **S**ize

- Hose inner diameter and Hose length are required
- Is the hose outer diameter critical?
- Does the hose need to be an exact length (OAL)?

### **T**emperature

- What temperature is the material being transferred?
- What is the temperature and duration of cleaning?
- What temperature is the environment the hose is in?

### **A**pplication

- How is this hose going to be used?
- Is the hose exposed to direct sunlight, chemicals, or abrasion?
- How much is the hose going to be bent?
- Is the hose at risk of being crushed?
- Is this being used in a flammable or explosive environment?
- Is the hose being used for a food grade product? Does it need to meet pharmaceutical standards?

### **M**aterial

- What material is being conveyed?
- What concentration is being used?
- What phase is the product in?
- Is the material sharp and abrasive?

### **P**ressure

- What is the maximum pressure required?
- Is the hose used for suction and delivery?

### **E**nds

- What style of hose ends are needed?
- What material do you need the ends to be made from?

### **D**elivery

- When is the hose needed?
- Are there any specific delivery or packaging requirements?

**DISCLAIMER:** While every effort has been made to substantiate the information contained in this catalog, CRP Industries Inc. will not warrant its accuracy or completeness.
