

Hot water washing hose in food environment with excellent resistance to high temperatures. Suitable for hygienic operations in dairies, canneries, slaughterhouses and all food processing industries.

### Technical Characteristics

Temperature Range: -20°C / +95°C  
(-4°F / +203°F)

Diameters: Different diameters available on request

### Hose Construction:

- Tube:** White, Seamless Synthetic rubber, fat resistant.
- Reinforcement:** High, strength synthetic fabrics.
- Cover:** Antimicrobial, Seamless synthetic rubber, ageing, ozone and fat resistant.
- Color Options:**  Standard is white - Other colors are optional
- Sterilization:** Tube rubber is made with materials according to FDA tit 21 art. 177.2600 and BfR XXI Cat.3. Phthalates free. Cover according to ISO 22196:2011
