

MANDREL BUILT HOSE FOR HIGH PURITY APPLICATIONS

Discover CRP Industrial Sanitary Hose—a name you might not know yet, but one that's been private labeling hose products for many years for a variety of industries. With years of experience serving sectors such as food, beverage, and hi-purity markets, CRP Industrial offers an extensive array of specialty hose products designed to enhance your current hose offerings with unmatched quality and performance.

Some of these products include:

■ **CRP Butyl ATC:** Premium grade transfer hose with a Bromobutyl tube specifically designed for the beer, wine, and dairy industries. The Armored Thermoplastic Cover (ATC) design provides sanitary enhancements over traditional rubber hose.

■ **CRP EPDM ATC:** Premium grade transfer hose with an EDPM tube. Recommended for edible liquids with high acid content. The Armored Thermoplastic Cover (ATC) design provides sanitary enhancements over traditional rubber hose.

■ **CRP Nitrile ATC:** Premium grade transfer hose with a Nitrile tube. Recommended for fatty and non-fatty food products. The Armored Thermoplastic Cover (ATC) design provides sanitary enhancements over traditional rubber hose.

■ **CRP Distillery ATC:** Premium grade transfer hose with a UHMW tube suitable for distilled and distillation by-products with alcohol concentration up to 96%. The Armored Thermoplastic Cover (ATC) design provides sanitary enhancements over traditional rubber hose.

CRP Industrial Specialty Process Hoses meet many industry standards including: FDA 21 CFR 177.2600, USP Class IV, 1907/2006/CE (REACH), DM21.03.73 e seguenti, and ISO 10993 Sections 5, 10, 11:2009.

Contact CRP Industrial for specific details on our ATC hose offering.
